

# Investigation of Associations Between Donor Risk Index Variables and Delayed Liver Graft Function

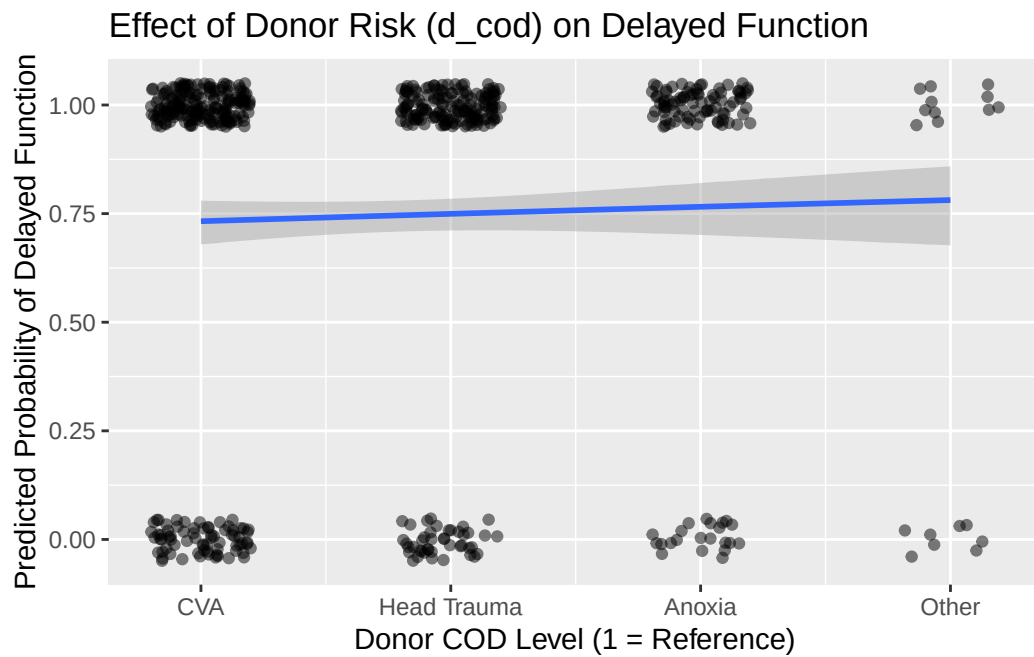

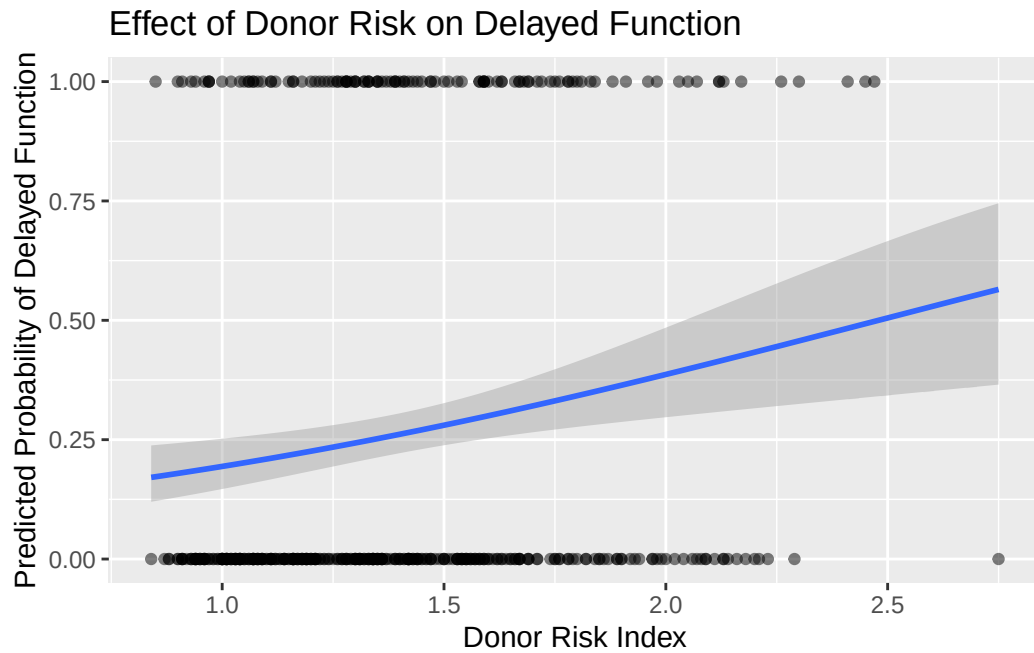

Kameran Reese, Naomi Taylor, Andrea Owusu, Maile Bateman

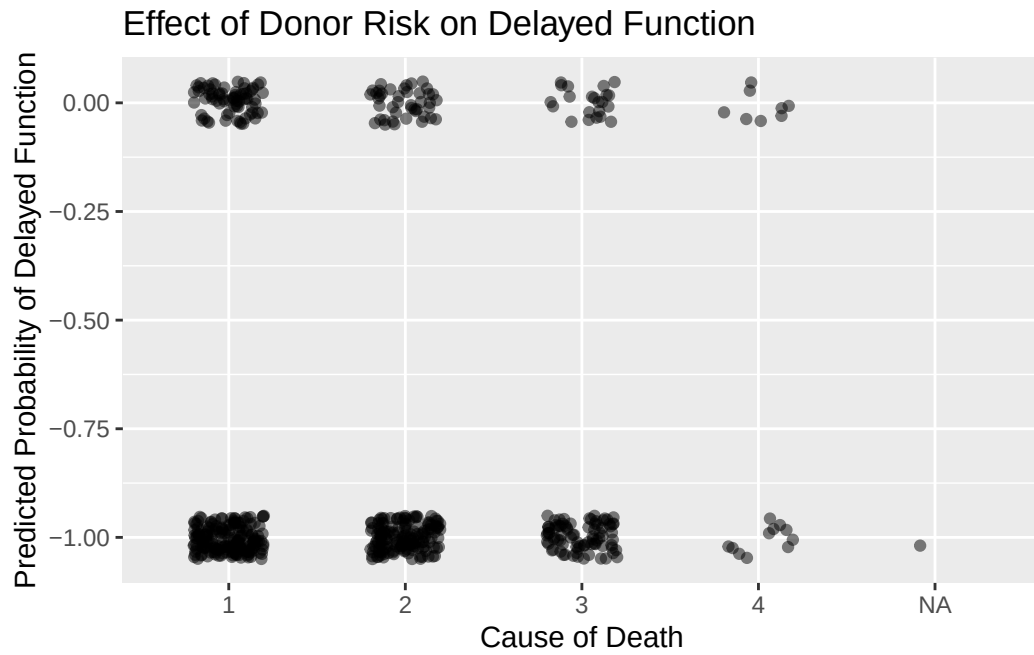

## Introduction

## Methods

## Results

|   | Coefficients                | Estimate  | PValue   |
|---|-----------------------------|-----------|----------|
| 1 | Intercept                   | -2.106469 | 0.000797 |
| 2 | Age                         | -0.005237 | 0.528224 |
| 3 | Cause of Death: Head Trauma | -0.312951 | 0.300045 |
| 4 | Cause of Death: Anoxia      | -0.255460 | 0.431517 |
| 5 | Cause of Death: Other       | 0.763904  | 0.176776 |
| 6 | Caucasian                   | -0.013151 | 0.961797 |
| 7 | Gender                      | -0.094485 | 0.702822 |
| 8 | Donor Risk Index            | 1.046880  | 0.009538 |
